

Hiking Hallasan Mountain on the sidelines of ICAMD 2019

(Tentative temperture between 8:00-8:30 AM return to hotel 5 PM at Dec 14 Sat.)

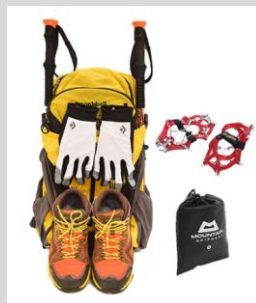

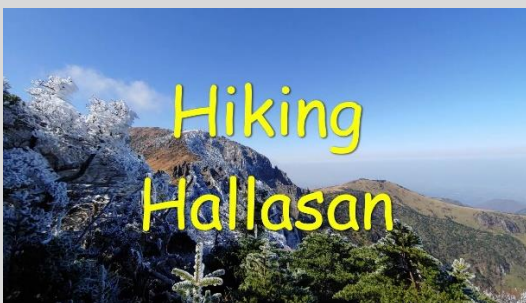

Hallasan Mountain Natural Reserve, due to its breathtaking beauty, known as 'Jeju Volcanic Island and Lava Tubes' are selected unanimously by the World Heritage Committee as the first World Natural Heritage Site in South Korea.

We have provided the details of hiking Hallasan with all possible information in the ppt linked at homepage. You can borrow all necessary stuffs from the 'Oshare' shop exactly opposite to the airport. It is advised to bring your clothes for winter hiking. Thin jackets and wind shields are very essential. The temperature at jeju city in December will be around 10⁰ C high/4⁰ C low. The temperature at Mt Hallasan might vary depending on the conditions (1⁰ C high /-7⁰ C low).

Our previous tours to Mt. Hallasan were breathtaking. You can find some of the pictures inside the ppt file linked at the homepage. We hope a spectacular tour with all the delegates and colleagues.

- 1) ICAMD committee will arrange a free shuttle bus to and from Halla Mountain (Witse Oreum) at Dec. 14. This will greatly reduce unnecessary time and efforts.
- 2) We are contacting 'Oshare' and they may open a booth ICAMD 2019. At the booth, you may be able to fit the size of the boots and others.
